

AI Spot is an upcoming initiative for the students, by the students, established with community-driven objectives that aim to foster innovation, and cultivate a technical society to share, create, and engage the like-minded and passionate.

Our prime objective is to create a network of independent thinkers to help nurture and encourage ground-level discussions to assist our community in being informed technologically and updated with state-of-the-art advancements, with a special emphasis around artificial intelligence. We plan to establish interesting and new ways to empower, explore, and develop a knowledge-first network.

With this, we anticipate creating a five-pronged cross-over between:

1. Students
2. Industry
3. Subject Matter Experts
4. Specialist Groups
5. Academicians

Our tentative agenda includes two different tracks:

- **Technical Activities**
Open to any motivated student, with the aim of learning state-of-the-art technologies for the next generation of intelligent machines;
- **Dissemination**
Open to everyone, with the aim of popularizing hot topics and important news about technologies and artificial intelligence.

Here we list some of the possible events:

Workshops

Reinforcement Learning w/ JAX
Analytics w/ Tableau
Machine Learning w/ TFLite + Flutter...

Film Screenings

Coded Bias (2020)
AlphaGo (2017)
Iperconnessi (2018)...

Competitions

TEDx talks battle
Hackathons
Kaggle
Debates and quizzes
...

Interactive media

Keynote sessions
Tech podcasts
Virtual meetups
Industry fairs
...

While we speak, this initiative is in its infant stages – but we would like to scale and cultivate a close-knit group of bright minds that can assist in moving the space of Artificial Intelligence forward. The prime idea of AI remains to simulate and imitate intelligent human behavior - but we have a long way to go, and an ample load of effort yet to be made.

Join and support us in this initiative by being a part of the first-movers, and help us take this from thought to finish. We seek at least 60 passionate Spot-ers to help us sign and back this project. Being in the early rounds of receiving financial assistance, your support is of utmost importance and will help bolster the foundational pillars of AI Spot - with each signature being looked at with a heart-full of gratitude.

Sign, support, share:
